

Nitrasol Magnesium 9%MgO 18%S03 [7.2% S] wt/vol

A foliar fertiliser for the correction of Magnesium deficiency based upon Magnesium Sulphate.

Nitrasol Magnesium 9% MgO wt/vol is formulated as a readily soluble foliar Magnesium fertiliser for the rapid correction of Magnesium deficiency in growing plants.

Directions for Use

Apply as recommended diluted in 200–400 litres of water depending on conditions.

- Fill tank with half the required amount of water.
- Start the Agitator.
- Carefully add the required amount of Nitrasol 9% MgO into the spray tank.
- Top-off with balance of the required water and continue agitation whilst spraying.
- Use non-ionic wetting agent.

Safety Data

Contains Magnesium Sulphate [EC No 231-298-2 CAS 7487-88-9]
